or provincial board of dentistry or AGD endorsement.
Provider ID 209557 4/1/2015 to 3/31/2018

Presenter

Sandra Lee Boody, RDH, M. Voc Ed.

Sandra has developed and published competency based Radiology curricula for the Department of Education, and continues to present Radiology seminars and biannual Technical Updates for Health Educators at State and National Health Curriculum conferences.

A University of Pittsburgh graduate, Sandra served 25 years as the Director and Founder of the Dental Careers Program at Northern Area Special Purpose Schools. She has also completed Orafacial Myology training at the University of Southern California.

Sandra works as an educational consultant and trainer for emerging products and international sales teams. Since the beginning of her career, she has maintained an active clinical presence in the hospital, nursing home, and private practice. Most recently she has served as an oral care consultant, training nursing staff and pharmacists on critical care settings, rehabilitation, nursing homes and hospice care.

Sandra has served as Western PA Dental Hygiene Association President, a patient advocate, advisory member and speaker for the National Cancer Institute Specialized Programs of Research Excellence and is an active member of SPOHNC National Survivor Volunteer Network. She currently sits on the board of directors for Face2Face Healing, a non-profit serving individuals with disfigurement.

Her personal journey in combination with her years of clinical experience has been an inspiration to national and international audiences.

Learning Objectives

- Define the key terms (basic concepts, terminology, fundamentals and equipment) associated with three-dimensional digital radiology
 - Describe the purpose and uses of three-dimensional digital radiology
 - Identify the essential components, equipment and patient preparation
- Identify the advantages and disadvantages of three-dimensional digital imaging
 - Review Diagnostic Images in Endodontics

Session Description

Three-dimensional digital imaging in dentistry is quickly becoming the desired technology because of the accurate information that it provides to the dental team. The purpose of this seminar is to discuss the basic concepts and indications of three-dimensional digital imaging, the terminology used, the equipment, the fundamentals, the advantages and disadvantages of this technology.

Registration: 5:00 pm – 5:30 pm (Light Dinner Served)
