Presenter

Dr. Stephen Hsu, PhD

Dr. Stephen Hsu, PhD, is an award-winning professor at Georgia Regents University College of Dental Medicine, international researcher, and CEO of Camellix. Steve's unique life experiences have led him to realize the potential health benefits of green tea and green tea extracts.

Steve excelled at Montclair State University in New Jersey where he received his Master of Arts degree in Molecular Biology, followed by a PhD in Cellular Biology and Anatomy from the University of Cincinnati College of Medicine. He spent four years at Memorial Sloan-Kettering Cancer Center, and another four years at ESPN as an International Sports Anchor, before joining the Georgia

Regents University College of Dentistry. Dr. Hsu a professor in the Department of Oral Biology and Department of Oral Health & Diagnostic Sciences.

Based on his research on the benefits of polyphenols extracted from green tea leaves, many technologies and products to treat various diseases and conditions, such as Xerostomia and viral infections, have evolved. Dr. Hsu created the MighTeaFlow formula for dry mouth for which **he received 2011 IADR/GSK Innovation in Oral Care Award to conduct a clinical trial. Dr. Hsu was selected as a TED speaker in 2014.**

Steve has contributed to more than fifty research publications, and was recently awarded the **2015 Georgia Bio Innovation Award!** He has also worked as an international sports anchor for ESPN. **Steve's bio-research is currently being reviewed by the National Institute of Health and Department of Defense for it's potential in fighting the Ebola virus.**

Learning Objectives

- Learn the newest strategies for treatment of the herpetic lesion patients
- Understand antivirals, their effect on cellular activity & safer treatment options
 - Significantly improve oral health and quality of life for patients using newly developed products
- Review the underlying causes of Xerostomia and the role of saliva in oral health
- Evaluate previous and emerging treatment approaches for managing Xerostomia
 - Differentiate the efficacy of currently marketed hand lotions & sanitizers
- Discuss current diagnostic criteria and methods while treating Sjogren's patients
- Evaluate emerging evidence related to the pathogenesis of the autoimmune disease
- Discuss potential clinical impact of results from research on Sjogren's syndrome
 - Review the newest research and development of powerful, pharmaceutical grade green tea extract
- Recognize the benefits EGCG (Green Tea) extract on soft and hard tissues

Session Description

Join us for an exciting and interactive session with this entertaining, and award winning Georgia Regents University Professor, Dr. Stephen Hsu. This course will enhance your dental team’s understanding of the hot topics in today’s dental health arena. Discover the benefits of pharmaceutical grade Green Tea extracts and their clinical applications in treating cold sores, dry mouth, dandruff, and viral infections. After attending this lecture participants will have the opportunity to significantly increase oral health and quality of life for “at risk” patients.
